PROFILE

Aspiring AI engineer building practical AI solutions — intelligent agents, RAG systems, automation workflows and data-driven applications with Python, LLMs and FastAPI. Available for AI automation and agentic AI projects on Upwork.

SKILLS

AI & LLM: AI agents, agentic AI, generative AI, LLM prompt engineering, RAG, LangChain, MCP, OpenAI API, Gemini API, NLP, customer-service chatbots

Automation: n8n, AI workflow automation, Zapier, Make.com, webhooks, Python automation, Gmail / Calendar / Sheets APIs

Backend: Python, FastAPI, Flask, REST APIs, microservices, JWT / RBAC

Data & ML: MongoDB, SQL, Pinecone, Supabase vector store, embeddings, machine learning, YOLOv8, computer vision, ElevenLabs voice AI

Frontend: HTML, CSS, JavaScript, Tailwind CSS, Chart.js

FEATURED PROJECTS

- **BlueWave AI — AI e-commerce & order automation platform**
  AI order receptionist, stock checks, order booking, invoicing and notifications orchestrated with n8n on a FastAPI + MongoDB backend, with an ElevenLabs voice layer and Gemini agent logic.
- **Muntaha Home Kitchen — food ordering & delivery platform**
  Full-stack storefront with cart checkout, real-time order tracking, admin dashboard, rider portal, payment proofs (Easypaisa / UPaisa / COD) and a Gemini AI voice/chat concierge.
- **ASIM SAQLAIN Perfumes — luxury fragrance brand site**
  Cinematic scroll-driven brand website with a video ritual sequence, fragrance collection and signature Midnight Oud showcase. Live on Vercel.
- **Agentic RAG Assistant**
  Document ingestion, chunking, embeddings and vector retrieval (Supabase pgvector) with an LLM agent that grounds answers in retrieved passages.
- **Voice AI Automation System**
  Real-time voice-to-backend pipeline: ElevenLabs voice layer, agent tool calling, FastAPI endpoints and n8n orchestration.
- **Real-Time License Plate Detection**
  YOLOv8 computer vision system detecting plates from a live video stream with structured detection output.

EXPERIENCE

AI Automation & Agentic AI Developer — Ongoing
Independent Projects

- Built AI agents, tool-calling systems and chatbots with OpenAI and Gemini APIs.
- Built RAG pipelines with document retrieval, chunking, embeddings and vector databases.
- Built workflow automations with n8n, webhooks and REST APIs.
- Built secure backends with Python, FastAPI and Flask; voice AI with ElevenLabs.

Junior Network Engineer Intern — Jan 2025 – Jun 2025
Arid University Rawalpindi

- Assisted in configuring and maintaining enterprise network infrastructure.
- Built Python scripts and documentation to optimise network monitoring workflows.
- Managed system security policies, database logs and technical support.

CERTIFICATIONS

- **Artificial Intelligence Using Python — DigiSkills.pk**
  Issued July 2026 · ID 29MT4ZBMK
- **Prompt Engineering with ChatGPT & Deepseek — Udemy**
  Issued September 2025
- **Data Analytics and Business Intelligence — DigiSkills.pk**
